The **University Heights Community Laboratory** is a space that provides DIY workshops focused on neighborhood development, community empowerment, and affordable and accessible education.

When the CoLab is not being used to host workshops it becomes a space open to the public to rent, allowing our more artistic members the chance to display their artwork for weeks at a time. Community members who are more entrepreneurial can use the space as a pop-up shop to experiment and test the market. Whether it be a lecture, meeting, or forum you'd like to host, we'd be happy to have you!
